

Patellar braces

medi Patella tendon support
Patella tendon support

Genumedi®
Knee support with patella silicone ring

Genumedi® PT
Knee support promotes muscular balance in cases of patellar lateralisation

Genumedi® PSS
Knee support for relieving strain on the patellar tendon entheses

protect.PT soft
Soft brace for patellar tracking control

medi PT control
Soft brace for patella tracking control with flexion / extension limitation

- Pressure on the quadriceps tendon improves proprioceptive performance and thus reinforces muscular support of the knee joint

- The massage effect achieved by the compressive fabric and silicone insert improves the blood circulation and aids absorption of haematomas and oedemas
- The seamless, tailored knee support improves proprioception and improves muscular support (stabilisation of the knee) Joint effusion and swelling Irritative conditions

also available: extra wide and sand

- Positive effect on the muscular structures that guide the patella to compensate for imbalance
- Reduces muscle tone of vastus lateralis
- Activates vastus medialis
- Laterally reinforced silicone ring gently guides the patella for reliable movement in the femoral groove
- Proprioceptive compression for reliable guidance and stabilisation of the joints

- Two-part pad system for easy patellar guidance and specific reduction of pressure and tension at the tip of the patella and the tibial tuberosity
- Offset strap system for balanced pressure distribution
- Pressure exerted by the integrated silicone dot coating stimulates proprioception to increase quadriceps muscle tone
- Proprioceptive compression for reliable guidance and stabilisation of the joints

- Correction of lateral patella maltracking due to a visco-elastic stabilisation pad
- Soft brace with compressive and proprioceptive effect

- Collateral stabilisation of the knee joint
- Prevention of hyperextension and limitation of range of motion
- Correction of lateral patella mal-tracking
- Compressive and proprioceptive effect
- Patella stabilisation buttress that prevents lateral movement throughout full flexion and extension
